

Control Freak ADDICT® WIRELESS

Now you can do it through walls.

Wireless portable DALI

commissioning!

The ADDICT makes standard DALI incredibly easy. And now we have added wireless connectivity to the ADDICT-sys.

**Up to 900 metres indoors
Up to 64 kilometres outdoors***

Just select the wireless radio modem option when you order your new ADDICT-sys and you're ready to connect to the bus via either an SCI from Creative Lighting or another ADDICT.

DALI Systems Integrator backpack, shown with radio modems in the side pockets. Backpack has a retractable handle & wheels for trolley use.

OH&S: No more trailing cables

\$\$\$ Labour cost saving: No more need to have an extra man finding the lights

The wireless kit is pre-configured by us ready to work with your ADDICT straight out of the box. Each kit comprises two Xtream Xtender radio modems with screw-in stubby antennae, mains adaptors, 12v 7ah battery, battery charger and all necessary leads and plugs.

The 'SCI TX' firmware that enables wireless commissioning comes standard in the ADDICT-sys v1.06 at no extra cost! With SCI TX you can also plug directly into the bus

via an SCI or another ADDICT-sys using the ADDICT serial leads and adaptors.

Optional DIDIO – a convenient din mount combination of integral modules of DALI power supply 21vdc 245mA, SCI Serial Communications Interface, and DALI Scene Controller with up to 12 i/o lines for switches and sensors eg manual DALI line emergency override, momentary push buttons, dry contacts from sensors. Up to 4 of the 12 i/o lines can be opto-isolated outputs eg as 24vdc outputs to drive 24v coils of contactors

Lightweight and compact:

Xtend Dimensions: 70mm x 140mm x 29mm

Xtend Weight: 200 grams

*Line of sight. Optional high gain antenna. Up to 22km outdoors line of sight using the standard antennae.
